The next generation of enzymatic analysis

In general ...

... enzymatic tests are used for the analysis of foods such as fruit juices, wine, beer, dairy products, egg, meat, etc. Two major objectives here are compliance with regulatory provisions and standards and, in particular, production control through production monitoring and resulting measures. The tests are performed manually, but more and more often semi- and fully automated.

Enzymatic parameters cover the determination of sugars (e.g. glucose or lactose), organic acids (e.g. malic acid or lactic acid), alcohols and other ingredients (e.g. sulfite). These photometric methods are based on the specificity of a particular enzyme for an analyte and the absorbance of the coenzyme at 340 nm. The results are measured by means of a photometer.

Improvement of the previous gold standard!

At R-Biopharm, we firmly believe that gold standards can always be improved. This being said, we see the introduction and continuous extension of our Enzytec™ *Liquid* product line as the next generation of enzymatic analysis: Established quality and reliability of results of enzymatic tests combined with increased user-friendliness and simultaneous cost reduction!

All reagents of the Enzytec™ *Liquid* product line are liquid and ready-to-use, which means a significant improvement for laboratory organization:

- In laboratories with lower sample throughput, a few tests can be performed and the reagents stored for further use (the original shelf life remains unchanged).

- In laboratories with medium to high sample throughput and possibly existing automation, the reagents can be used directly in the analyzers and are available cooled for further analyses.
- In combination with our liquid stable multi-sugar and multi-acid standards, an innovative test system results.

Enzytec™ *Liquid* Sucrose/D-Glucose (Art. No. E8180)

Enzymatic analysis – Enzytec™ *Liquid* product line

Features & advantages

Cost-effective

50 - 500 determinations per kit
(manual or automated)

Established quality

High precision and sensitivity
with fast and reliable analysis

User-friendly

Reagents are liquid and
ready-to-use, same test procedure
for all parameters

Robust and stable

Reagents can be used until expiry
date after opening

Sustainably

Avoidance of reagent discard due
to high reagent stability

Automated

- Easy and safe use through analyzer
- Automation is easily possible

Enzymatic analysis – Enzytec™ Liquid product line

Product	Description	No. of tests/amount	Art. No.
Acids			
Enzymatic tests		Manual/auto-analyzer**	
Acetic acid	Enzymatic test (340 nm)	50/≥ 500	E8226
Citric acid	Enzymatic test (340 nm)	50/≥ 500	E8230
Formic acid	Enzymatic test (340 nm)	50/≥ 500	E8210 Coming soon
D-Gluconic acid	Enzymatic test (340 nm)	50/≥ 500	E8520
D-Isocitric acid	Enzymatic test (340 nm)	50/≥ 500	E8550
D-/L-Lactic acid*	Enzymatic test (340 nm)	50/≥ 500	E8240
D-Lactic acid	Enzymatic test (340 nm)	50/≥ 500	E8245
L-Lactic acid	Enzymatic test (340 nm)	50/≥ 500	E8260
D-Malic acid	Enzymatic test (340 nm)	50/≥ 500	E8270 Coming soon
L-Malic acid	Enzymatic test (340 nm)	50/≥ 500	E8280
Sugars			
D-Galactose	Enzymatic test (340 nm)	50/≥ 500	E8120
D-Glucose	Enzymatic test (340 nm)	50/≥ 500	E8140
D-Glucose/D-Fructose	Enzymatic test (340 nm)	50/≥ 500	E8160
Lactose/D-Galactose*	Enzymatic test (340 nm)	50/≥ 500	E8110
Lactose/D-Glucose*	Enzymatic test (340 nm)	50/≥ 500	E8130
Maltose/Sucrose/D-Glucose	Enzymatic test (340 nm)	50/≥ 500	E8170 Coming soon
Starch	Enzymatic test (340 nm)	50/≥ 500	E8100 Coming soon
Sucrose/D-Glucose*	Enzymatic test (340 nm)	50/≥ 500	E8180
Sucrose/D-Glucose/D-Fructose*	Enzymatic test (340 nm)	50/≥ 500	E8190
Others			
Acetaldehyde	Enzymatic test (340 nm)	50/≥ 500	E8300 Coming soon
Ammonia	Enzymatic test (340 nm)	50/≥ 500	E8390
Ethanol AOAC Official Method Final Action 2017.07	Enzymatic test (340 nm)	50/≥ 500	E8340
Glycerol	Enzymatic test (340 nm)	50/≥ 500	E8360
SO ₂ -Free (Free Sulfite)	Colorimetric test (340 nm)	100/≥ 1000	E8610
SO ₂ -Total (Total Sulfite)	Colorimetric test (340 nm)	100/≥ 1000	E8600
D-Sorbitol/Xylitol	Enzymatic test (340 nm)	50/≥ 500	E8380 Coming soon
Urea/Ammonia	Enzymatic test (340 nm)	50/≥ 500	E8395

** Depending on instrument.

Enzymatic analysis – Enzytec™ *Liquid* product line

Standards (for manual and automated use)

Product	Description	No. of tests/amount	Art. No.
Alcohol standard	Alcohol assay control solution	10 x 1.5 mL	AQ03-015
Enzytec™ Multi-acid standard low	Assay control solution for manual use of 7 different acids	3 x 3.5 mL	E8460
Enzytec™ Multi-acid standard high	Calibration solution for automation of 7 different acids	3 x 3.5 mL	E8465
Enzytec™ Multi-sugar standard low	Assay control solution for manual use of 7 different sugars	3 x 3.5 mL	E8440
Enzytec™ Multi-sugar standard high	Calibration solution for automation of 7 different sugars	3 x 3.5 mL	E8445

Semi-automation with RIDA®CUBE SCAN

Full flexibility for low sample throughput

Simple – anytime - anywhere

The RIDA®CUBE SCAN is a small, cost-effective walk-away system for single tests. Due to its compact design, the RIDA®CUBE SCAN allows you to semi-automate your determinations independent of location. The use of the system simplifies and shortens the performance of your enzymatic tests

due to the single-dose reagents provided. After sample input via the tablet and sample pipetting, the test is performed automatically. The results are then displayed on the tablet and can be exported to your computer.

Test procedure

- 1 Insert the RFID card

- 2 Enter the sample data in the tablet app

- 3 Pipette the sample into the test tube

- 4 Insert the test tube into the device

Semi-automation with RIDA®CUBE SCAN

RIDA®CUBE SCAN, Art. No. ZRCS0546

Features & advantages

Cost-effective

Low purchase price and maintenance-free device

Simple

Ready-to-use reagents for individual tests

User-friendly

RFID card with all test settings and calibration curves

Flexible

Semi-automated processing of individual samples at any time and from anywhere

Time saving

After sample addition, the test sequence is automated

Location-independent

Small and portable device
(16 x 13 x 14,5 cm)

Full automation with Pictus 500

Time and cost savings

The automation of Enzytec™ *Liquid* tests leads to a reduction in costs, processing time and user errors during performance. In this context, we offer our Pictus 500 analyzer with a full service package

including instrument, support, maintenance, reagents and applications. However, if you already own an analyzer, we will be happy to provide you with the necessary applications as well.

Features & advantages

User-friendly

Automatic sample pre-dilution

Established quality

No run errors and better reproducibility

Cost-effective

Cost reduction due to shorter processing time and significantly lower reagent consumption

Robust and stable

Long on-board stability of reagents

Time saving

Walk-away and multi-tests for large sample series

Flexible

Continuous loading of samples and reagents

Pictus 500 (Art. No. ZP500)

Everything from a single source

Our strong team of developers, application and service specialists, product managers and sales will support you from the idea to the routine application.
